Portfolio: tamthong1115.github.io/portfolio

PROFESSIONAL SUMMARY

Fullstack Engineer with experience creating and scaling modern web applications across React, Next.js, TypeScript, and Java microservice ecosystems. Skilled in architecting RESTful APIs, integrating third-party payment and AI solutions, automating CI/CD pipelines, and crafting high-performance user interfaces.

TECHNICAL SKILLS

Frontend:	React 19, Next.js, TypeScript, JavaScript (ESNext), Tailwind CSS, Three.js, React Three Fiber, HTML5/CSS3
Backend:	Java (Spring Boot 3, Spring Cloud), Node.js, Express, C#, .NET, Blazor, RESTful APIs, Microservices
Databases & Cache:	PostgreSQL, MongoDB, SQL Server, Redis, Prisma ORM
DevOps & Tools:	Docker, Git, GitHub Actions (CI/CD), Vitest, Playwright, Linux, Webpack/Vite

FEATURED PROJECTS

E-Commerce Next.js Platform — Team Leader

Multi-vendor e-commerce platform featuring AI-powered image search, role-based merchant dashboards, and real-time inventory updates.

Stack: Next.js, TypeScript, PostgreSQL, Prisma, Tailwind CSS, Redis, Pusher, Google GenAI

Hotel Booking Application — Fullstack Developer

End-to-end hotel search and reservation system featuring interactive Mapbox location discovery, Stripe payments, and automated test suites.

Stack: React, Node.js, Express, MongoDB, Stripe, Mapbox, Vitest, Playwright

Clinic Management System — Team Leader

Microservices architecture for medical clinic operations, appointment management, service catalog, and secure patient portals.

Stack: Java, Spring Boot 3, React, PostgreSQL, Docker, Spring Cloud Gateway, Netflix Eureka

Warehouse Management System (WMS) — Software Developer

High-volume logistics platform handling ASN processing, LPN barcode tracking, and optimized warehouse picking and packing strategies.

Stack: Blazor, C#, .NET, PostgreSQL, SQL Server
