# Truong Tam Thong

Go Vap, HCM City • tamthong.1115@gmail.com • +84 865 486 650 • linkedin.com/in/tamthong1115
github.com/tamthong1115

Fullstack Engineer with experience in creating and improving web applications. Skilled in Java, JavaScript, and React. Familiar with building RESTful APIs, integrating third-party services, and using modern tools like Git and CI/CD for efficient development. Passionate about learning new technologies and solving problems to build useful and reliable solutions. Works well in a team and enjoys contributing to meaningful projects.

## SKILLS

**Languages:** Java, Javascript & Typescript, C#

**Database Management System:** PostgreSQL, SQL Server, MongoDB

**Frameworks/Libraries:**

- ReactJS, NodeJS, NextJS, Blazor
- MaterialUI, Shadcn, SocketIO
- Spring boot, Hibernate

**Testing Frameworks:** Vitest, Playwright

**Tools:** Docker/Podman, Postman, Git, Github Actions

**Others:**

- Understanding the OOP concepts, SOLID principles, and Design patterns.
- Experience setting up and maintaining CI/CD pipelines for automated testing and deployment
- Linux: Daily use for development and system management, including Docker/Podman containerization

## WORK EXPERIENCE

**Software Developer** **May 2025 - Present**

**TKSolution** **HCMC - VietNam**

- Engineered custom WMS features in Blazor to handle complex logistical workflows, including ASN processing, LPN tracking, and optimized picking strategies, directly improving warehouse operational scalability.
- Maintained existing codebases and proactively diagnosed complex software bugs, ensuring continuous system availability and reducing downtime for active, high-volume warehouse environments.
- Optimized SQL queries to improve system performance and reduce latency in high-volume warehouse environments.

**Fullstack Intern** **Dec 2024 - Feb 2025**

**Hololab** **HCMC - VietNam**

- Setup and configure GitLab with Docker, including automated backups to S3 for data protection.
- Developed GitLab CI/CD pipelines to automate testing, building, and deployment based on branches.
- Developed a CRM system using Next.js and MongoDB to manage products, contacts, and projects for internal company operations.

## PERSONAL PROJECTS

**Booking Hotel Application (Web/Source Code):** **Dec 2023 - Apr 2024**

**Description:** Developed a hotel booking platform inspired by Booking.com, utilizing React and Node.js. The platform enables users to search, view, and book hotels, offering a seamless and intuitive user experience.

**Technologies:**

- Developed a full-stack hotel booking application using the MERN stack.
- Integrated third-party services like Stripe for payment processing and Cloudinary for image hosting.
- Utilized Mapbox for location-based features and React Query for efficient data fetching and state management.
- Implementing unit tests with Vitest and E2E tests with Playwright, and automating the workflow using GitHub CI/CD.

## TEAM PROJECTS

**Ecommerce Application (Web/Source Code):** **Oct 2025 - Dec 2025**

**Description:** An e-commerce platform inspired by Tiki and Shopee. Built with Next.js and PostgreSQL, it features secure role-based login (Admin, Seller, Customer) using Better-Auth and Shadcn UI

**Role:** Team Leader

**Technologies:**

- **Core Stack:** Next.js (App Router), PostgreSQL, TypeScript.

- **Authentication & Security:** Better-Auth (Role-based access for Admin/Seller/Customer).
- **Frontend & UI:** Shadcn UI, Tailwind CSS, TanStack Query for data fetching.
- **Integrations:** Stripe (Payments), Cloudinary (Image management).

**Responsibilities:**

- Designed the database schema and implemented core server-side logic using Next.js Server Actions.
- Led the development team by establishing coding standards, reviewing pull requests, and resolving merge conflicts.

**Clinic Management (Frontend Code/Backend Code):** **May 2024 - Jul 2024**

**Description:** An clinic management with microservices spring boot and react frontend

**Role:** Team Leader

**Technologies:**

- **Core Stack:** Java, Spring Boot 3, React.js, PostgreSQL.
- **Microservices & DevOps:** Docker, Spring Cloud Gateway, Netflix Eureka (Service Discovery).
- **Authentication & Security:** Spring Security, JWT.
- **Frontend & UI:** Tailwind CSS, TanStack Query.
- Designed the database schema and configured the **API Gateway** and **Eureka** for seamless service orchestration.

## EDUCATION

**Information Technology** **Oct 2022 - Jan 2026**

Ho Chi Minh City University of Transport **GPA:** 3.51
